The Environmental Protection Agency (EPA) has designated January 2018 as "National Radon Action Month"

Radon is a naturally occurring radioactive gas that can cause lung cancer.

The Environmental Protection Agency (EPA) has designated Erie County, New York as a "Zone 1" area for the presence of radon gas meaning that it has a predicted average indoor radon screening level greater than 4 pCi/L, the highest potential for radon gas.

You can't see or smell radon. Testing is the only way to know your level of exposure.

Please feel free to contact our office to schedule a presentation on "National Radon Action Month" and testing for the presence of radon
